📄 PROFILE

Full-Stack Developer skilled in JavaScript, React, Node.js, and MongoDB, with hands-on experience building end-to-end applications. Completed a Netflix Clone with authentication, API integration, responsive UI, and cloud deployment. Background in firmware validation strengthens debugging and problem-solving abilities.

🧠 SKILLS

Programming — Selenium WebDriver (Java), JavaScript, Node.js, React, Tailwind CSS, HTML

Databases — SQL, MongoDB

Dev Tools — Git, GitHub, VS Code, Jira

Testing and Test Management Tools — Postman, Zephyr, HP ALM

📁 INDEPENDENT PROJECTS

- 2025
- Netflix Clone Project** [🔗](#)
Tech Stack: JavaScript, React, Node.js, Express, MongoDB, Vercel, Render, Postman
- Developed and deployed a full-stack video streaming platform inspired by Netflix.
 - Built RESTful APIs for authentication, movie catalog management, user profiles, and secure data handling using Node.js and Express.
 - Used Postman to insert movie data into MongoDB and validate all API endpoints.
 - Deployed the frontend on Vercel and backend APIs on Render, ensuring a fully functional end-to-end application.

📖 COURSES

- 2025
- Full-Stack Web Development**
Udemy
HTML, CSS, JavaScript, React, Tailwind CSS, Node.js, APIs, Databases
- 2023
- Selenium WebDriver with Java**
Udemy
Gained hands-on experience with Selenium WebDriver, Java, TestNG, locators, page object model (POM), and automated UI workflow testing.
- 2020
- Manual Testing Training**
QSpiders, Bangalore

👛 PROFESSIONAL EXPERIENCE

- 01/2020 – 05/2022
India
- Product Validation Engineer**
UST Global
- Performed end-to-end BIOS and Firmware validation for Intel server platforms (pre-silicon and post-silicon), ensuring compliance with design and platform requirements.
 - Created detailed test plans, executed test cases, and documented results using **HP ALM** and **Jira**.
 - Utilized **Git** for version control and collaborative development workflows.
 - Conducted basic **API validation** using Postman to verify data flow and system integration.
 - Worked with Simics, BIOS boot flow, board bring-up processes, and managed the complete bug lifecycle.
 - Validated key system components including **IFWI**, **SMBIOS**, Power Management, and **PCIe**, ensuring platform stability and performance.

🎓 EDUCATION

- 2015 – 2019
India
- Electronics and Communication Engineering**
Sahyadri College Of Engineering and Management
